

FOR IMMEDIATE RELEASE

**New Patented, Non-Invasive Cloud-Based Medical Diagnostic Technology
Bypasses the Limitations of Many Current Screening and Testing
Methods with Faster Results and Lower Costs**

KMZ Holdings' innovative Zepronic Diagnostics System provides a game-changing evolution in the field of medicine, equipping health institutions and health professionals with an extraordinary new method of human diagnostic testing for many diseases.

Los Angeles, CA – October 30, 2020 – Zepronic Diagnostics, part of cutting-edge medical diagnostic company KMZ Holdings LLC (<https://www.kmzholdings.net>), offers a patented, proprietary cloud-based evolutionary tool for the medical field.

For health facilities and medical professionals, the Zepronic Diagnostic System provides accurate, hassle free, pain free, rapid medical testing of patients. At the same time, the need for prohibitively expensive scanning and diagnostic equipment, along with costly maintenance, is dramatically reduced.

The Zepronic Diagnostics System consists of a hand-held probe, the size of a white board marker, which emits an electronic medical field and collects return waves that are reflected back through the body. These waves can surpass the detection levels of current medical technologies such as X-rays, MRIs and ultrasound, to name a few. Billions of data points are then uploaded to our patented proprietary cloud-based system, which compares it against a database of normal values.

Within three minutes, the System generates a complete tabbed report on the entire human body that encompasses chemicals and chemically bonded structures such as electrolytes, RNA, and DNA; all cells in the body and their internal structures; all organs in the body; and all eleven body systems. This detailed tabbed report can then be quickly disseminated to clinicians and other health providers around the corner or around the world, while meeting HIPPA compliance requirements.

The Zepronic Diagnostic testing technology will prove remarkable for testing for many diseases and illnesses, including CMP, urinalysis, glucose, LDL, HDL, Hepatitis B and more.
